

Entorno de Workbench

Isabel Riomoros

Ejecutamos MySQL Workench

The screenshot shows the MySQL Workbench interface. A red rectangle highlights the menu bar (File, Edit, View, Query, Database, Server, Tools, Scripting, Help) and the toolbar below it. A red circle with the number '1' is placed next to the 'File' menu. The main editor window shows a SQL script with two lines: `1 CREATE DATABASE db1;` and `2 USE db1;`. The left sidebar contains a 'Navigator' pane with sections for 'MANAGEMENT' (Server Status, Client Connections, Users and Privileges, Status and System Variables, Data Export, Data Import/Restore), 'INSTANCE' (Startup / Shutdown, Server Logs, Options File), and 'PERFORMANCE' (Dashboard, Performance Reports, Performance Schema Setup). Below this is an 'Administration' pane with 'Schemas' and 'Information' tabs. The 'Information' tab shows 'No object selected'. The right sidebar contains an 'SQLAdditions' pane with a 'CREATE DATABASE Syntax' section. The bottom of the interface shows an 'Output' pane with a dropdown menu set to 'Action Output' and a table with columns: #, Time, Action, Message, and Duration / Fetch.

CREATE DATABASE Syntax:

```
>
CREATE {DATABASE | SCHEMA
    [create_specification] .

create_specification:
    [DEFAULT] CHARACTER S
    | [DEFAULT] COLLATE [=]
```

CREATE DATABASE creates a database with the given name. To use this statement, you need the CREATE privilege for the database. CREATE SCHEMA is a synonym for CREATE DATABASE.

Schema:

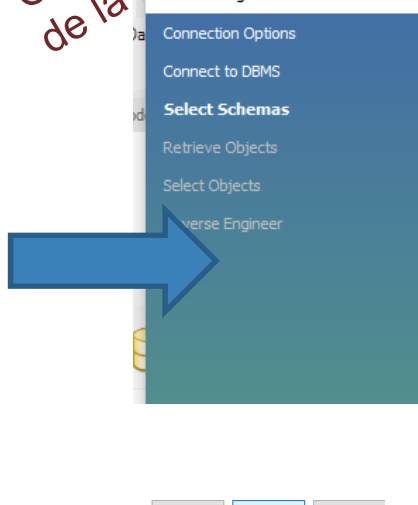

Esquemas de las bases de datos que tenemos o hemos tenido en el servidor. En el esquema actual está la base de datos de los alojamientos de la Comunidad de Madrid. He desplegado las tablas y podemos observar las distintas tablas de las que está compuesta la Base de Datos

Crear modelo EER
de la base de datos

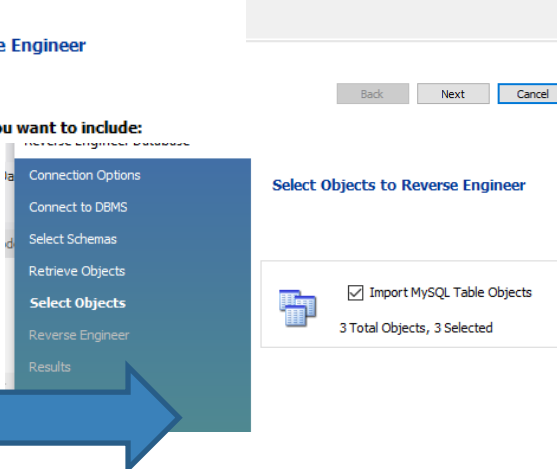

Dejamos las opciones por defecto,
importante seleccionar la base de
datos que queremos pasar al modelo
EER

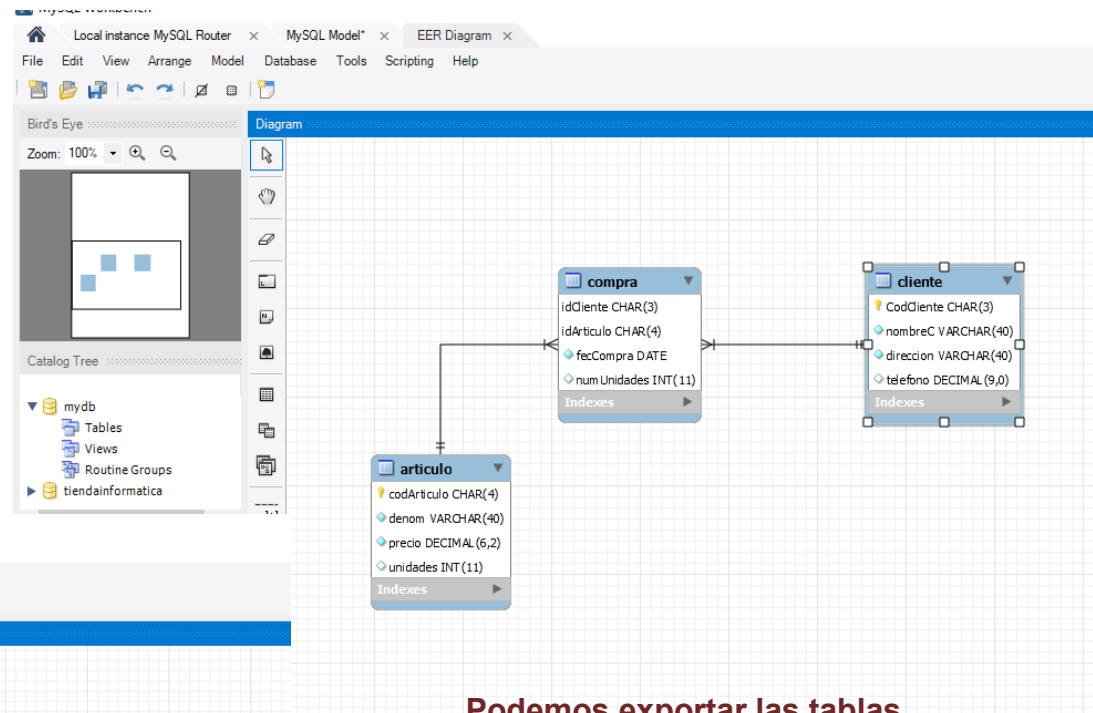

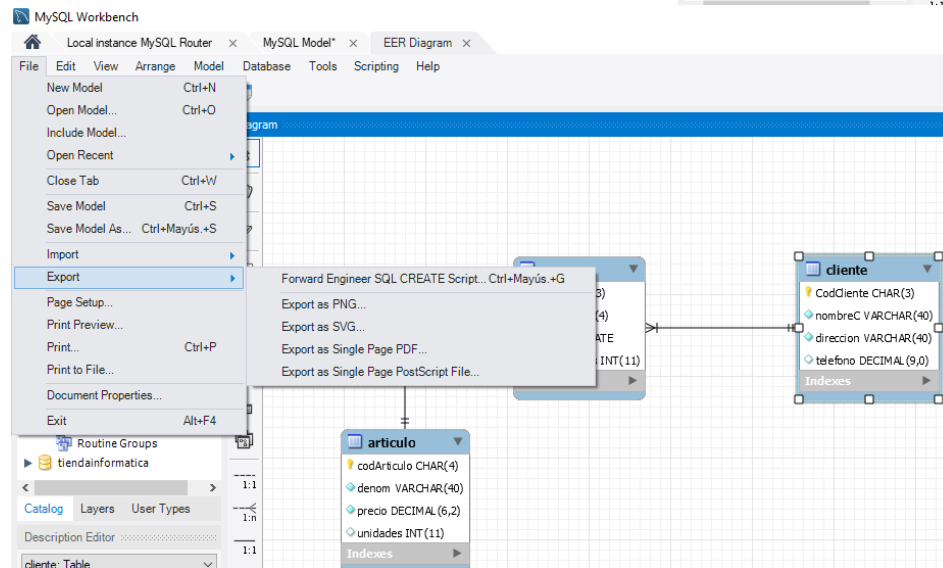

Select Schemas to Reverse Engineer

- Select the schemas you want to include:
- ☐ aloja
 - ☐ campocalado
 - ☐ sakila
 - ☒ tiendaInformatica
 - ☐ world

Con estos pasos hemos creado las tablas y las relaciones de la base de datos que hemos seleccionado

Podemos exportar las tablas como imagen (png) o como pdf, según nos interese. Para la realización de un proyecto de Bases de Datos nos interesa la imagen.
